The Pacific Fishery Management Council (PFMC or Council) and its advisory bodies will meet September 8-11 and 13-15 by **webinar only**, to address issues related to groundfish, ecosystem, highly migratory species, salmon, Pacific halibut, and administrative matters.

Key actions for consideration at the meeting include:

- Adopt a preliminary preferred alternative harvest control rule for Southern Oregon/Northern California Coast coho.
- Adopt proposed changes to the Pacific Halibut Catch sharing plan and regulations for recreational and commercial fisheries in 2022.
- Consider the outcomes of the Fishery Ecosystem Plan Climate and Communities Initiative and provide guidance on the development of related future activities.
- Adopt final recommendations on the issuance of exempted fishing permits in highly migratory species fisheries.
- Adopt Groundfish Stock Assessments for use in 2023 and Beyond.
- Adopt initial groundfish harvest specifications and management measures for 2023-2024.
- Adopt a range of alternatives to address gear switching in the limited entry trawl catch shares fishery.
- Consider final action to delay implementation of the groundfish electronic monitoring program.
- Adopt a preliminary preferred alternative to improve utilization in the at-sea sectors of the Pacific whiting fishery.
- Review Fishery Management Plans for consistency with standardized bycatch reporting requirements.

A schedule of advisory body meetings is provided on the last pages of the attached proposed agenda. Copies of briefing materials prepared for the meeting can be found on our website www.pcouncil.org no later than Friday, August 20, 2021.
